

## Indication descriptions

- Fine Wrinkle and Eye Area Lifting  
· Muscle Stimulation
- Redness Improvement  
· Reduce Inflammation and Acne
- Lymph Massage
- Increase in Skin Elasticity  
· Collagen Generation  
· Tightening

## Best with EVE Synergy

Synergy gel is ultra moist long lasting professional gel specially designed to increase conductivity. It includes Peptides and HA complexes to maximize skin improvement results of EVE Synergy.

For Export

eVE Synergy

# COMFORT YOU AND WILL GO UP WITH YOU

### Specification

RF Mode	1MHz
EMS Mode	Dual Frequency : 100Hz, 330Hz Medium Frequency : 2,000Hz Long Pulses : 68Hz Short Pulses : 2Hz
Microcurrent Mode	MTB : 20Hz ALV : 30Hz LMP : 300-500Hz MYO : 100-300Hz
Power input	100-240V~, 50/60Hz, 1.5A (24V / 5A)

# A Beautiful Synergy of RF and Current Therapy

EVE Synergy is an all-purpose skin care device that helps anti-aging and skin improvement by utilizing of RF, EMS, and Microcurrent either alone or in combination.

RF function remodels the collagen in the dermis to improve wrinkles and tighten skin.

At the same time, EMS supports the skin by stimulating the deep muscles of the skin.

So it is the most advanced device that can produce a clear anti-aging effect.

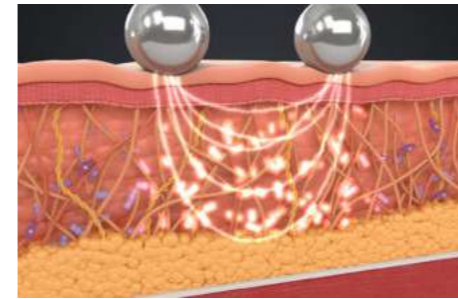

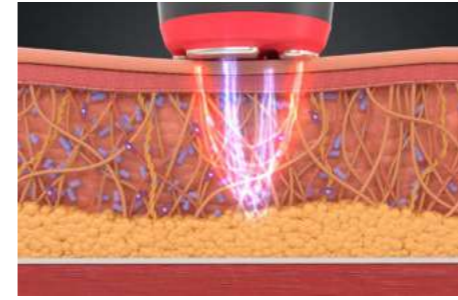

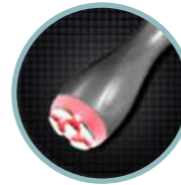

## Synergy effect to your skin

You deserve to be beautiful

### Synergy Mode (RF & EMS / RF & Microcurrent)

A synergistic program that boosts skin elasticity from the depths of the skin.

- **RF & EMS** RF assisted collagen generation at the dermis level along with EMS at the muscle level.
- **RF & Microcurrent** Comprehensive skin care program by contouring the dermis layer using RF and stimulating ATP, which is the energy source of protein and collagen.

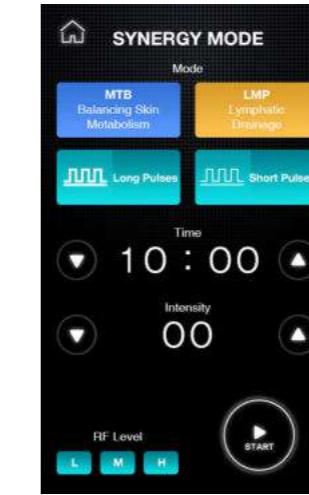

### Pro Mode (Microcurrent & EMS)

The EVE Microcurrent function delivers low intensity and low frequency electric impulses into the skin. Though hardly perceptible, these Microcurrents mimic the body's own bioelectric currents, and hence regulate/re-ignite electro-dependent intracellular processes.

## PRE-SET PROTOCOL

EVE provides 10 protocols optimized for each skin concern. With this proven protocol, you can provide a professional and appropriate treatment for your skin type.

Synergy Mode

Optimized treatment for skin care using RF with EMS/ Microcurrent at the same time

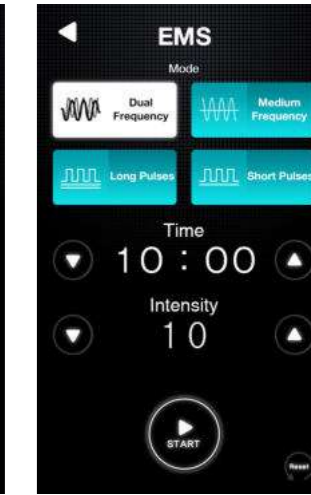

Pro Mode

Pre-programmed sequences of microcurrent steps, each aiming to achieve specific skincare purpose

Multi-Step Programs

Treatment program set according to skin age and skin problems

EMS Programs

Comprehensive anti-aging care and muscle elasticity stimulation

## WHY EVE SYNERGY?

The beginning and end of anti-aging

- ✔ Simultaneous output of RF + EMS / RF + Microcurrent
- ✔ No epidermal damage
- ✔ No bleeding / Pain
- ✔ No downtime
- ✔ Skin elasticity
- ✔ Promotes collagen regeneration
- ✔ Lymphatic massage
- ✔ Muscle exercise effect
- ✔ Redness improvement

## VARIOUS APPLICATOR

**Synergy Handpiece**  
RF and Microcurrent or EMS

**T Type**  
Effective for wide areas, narrow areas, and neck area treatment

**Gloves**  
Ultimate precision delivery compare to handpieces

**Ball Type**  
Effective for all curves of the face

**Comb Type**  
For scalp treatment

**Micro Patch**  
Hand-free treatment (Optional)
